

JALOLIDDIN XALIMOV

AI / ML ENGINEER · STARTUP BUILDER

jaloliddinxalimov.0103@gmail.com | +998 91 733 64 04 | xalimov.vercel.app | Samarkand, Uzbekistan

PROFILE

AI/ML engineer passionate about building intelligent systems that solve real-world problems. Strong foundation in Data Science and Machine Learning, focused on designing predictive algorithms and data-driven solutions with clean, logical architecture. Alongside deep technical work, I make effective use of modern AI-powered tools and a vibe-coding approach to turn ML models into fully working web products in short timeframes. Actively competing in startup ecosystems and continuously improving technical and leadership skills.

EDUCATION

Software Engineering

TATU Samarkand Branch | 2022-2026

Foundation in algorithms, software engineering, and system design.

Data Science Program

School 21, Samarqand | 2025-2026

Project-based AI/ML practical training with peer-to-peer collaboration: attention mechanisms, CNNs, RNNs, clustering, and dimensionality reduction.

SKILLS

Machine Learning

PyTorch, scikit-learn

Full-Stack Development

React / TypeScript / Vite, NestJS / Node.js — built efficiently with AI-powered development tools.

Data Science

Clustering (K-means, DBSCAN, GMM), dimensionality reduction (PCA, t-SNE, UMAP)

Deployment

Oracle Cloud VPS, Docker Compose, Nginx, Let's Encrypt SSL

EXPERIENCE

Team Lead — National AI Hackathon

2026

Led an AI startup prototype in a competitive hackathon environment. Designed the technical architecture and coordinated the development strategy. Ranked 6th place in our category among national teams.

Web Interface Developer — Global Game Jam

2026

Collaborated as part of a team in a rapid game development sprint. Team achieved 1st place nationally in Uzbekistan.

Freelance Developer — Eye Zevs (Client Project)

2026

Built and refined a Telegram lead-scraper SaaS for a client. Writes results to Google Sheets and generates downloadable export files. Deployed to Oracle Cloud with Docker Compose, DuckDNS, Nginx reverse proxy, and Let's Encrypt SSL.

PROJECTS

Mizan AI

AI-powered pre-trial legal consultation platform using RAG to analyze cases under Uzbekistan law, helping citizens and businesses resolve disputes through mediation before litigation. Built for Andijon Milliy AI Xakaton 2026.

Revolutionary Layers Method

Authored an 8-step strategic framework applying Dependency Inversion and Inverse Planning principles to business strategy, helping startups identify root causes behind “normal” habits and rebuild at an infrastructure level. Published on GitHub with full case studies in Uzbek, English, and Russian.
