PROFILE

I am an AI/ML student with practical experience in Python, machine learning, and AI/LLM integration. I am currently studying Data Science and Machine Learning at School 21. I independently built a Telegram scraping system and worked on AI/LLM integration for the Mizan AI project. I am interested in building practical AI applications and developing my machine-learning skills.

EDUCATION

2025 – 2026 **Data Science — Machine Learning Track**
expected completion School 21, Samarkand
soon

TECHNICAL SKILLS

Programming: Python
Machine Learning: PyTorch, scikit-learn
Deployment: Docker, Nginx, Oracle Cloud
Other: VS Code, Git, GitHub

EXPERIENCE

Data Science & Machine Learning Practical Projects <i>School 21, Samarkand</i> - Worked on close to 30 real Data Science and Machine Learning projects over more than a year as part of the School 21 practical training track. - Projects are hosted on School 21's private GitLab platform and are not publicly accessible. - Applied and strengthened ML/DS skills through continuous, hands-on, project-based coursework.	2025 – Present
Freelance Developer — Independent Project <i>AI project</i> - Independently built a Telegram scraping system. - Created the project structure and implemented its main scraping functionality. - Worked with Python and TypeScript-based components. - Prepared the project for deployment using Docker and server tools. View project on GitHub	2026

PROJECTS

Mizan AI <i>AI project</i> - Worked on integrating AI and large language model functionality. - Helped connect the AI component with the project's main workflow. - Worked on the project as a practical AI application concept.
Revolutionary Layers Method <i>Personal startup strategy project</i> - Created and documented a method for analysing startup ideas and business problems. - Published the project in Uzbek, English, and Russian. View project on GitHub
