Profile

I am an AI/ML student with practical experience in Python, machine learning, and AI/LLM integration. I am currently studying Data Science and Machine Learning at School 21. I independently built a Telegram scraping system and worked on AI/LLM integration for the Mizan AI project. I am interested in building practical AI applications and developing my machine-learning skills.

Education

School 21, Samarkand

Data Science — Machine Learning Track

2025–2026, expected completion soon

Technical Skills

Programming: Python,

Machine Learning: PyTorch, scikit-learn

Deployment: Docker, Nginx, Oracle Cloud

Other: VsCode, Git, GitHub

Languages

Uzbek: Native

English: Basic reading and listening comprehension; limited speaking

Russian: Basic reading and listening comprehension; limited speaking

Experience

Freelance Developer — Independent Project

2026

- I independently built a Telegram scraping system.
- I created the project structure and implemented its main scraping functionality.
- I worked with Python and TypeScript-based components.
- I prepared the project for deployment using Docker and server tools.

Projects

Mizan AI

AI project

- I worked on integrating AI and large language model functionality.
- I helped connect the AI component with the project's main workflow.
- I worked on the project as a practical AI application concept.

Revolutionary Layers Method

Personal startup strategy project

- I created and documented a method for analysing startup ideas and business problems.
- I published the project in Uzbek, English, and Russian.
