👤 Profile

AI/ML engineer specializing in Python, machine learning, and LLM integration. Independently designed and deployed a production AI agent capable of self-diagnosing backend issues and applying approved code fixes. Built and deployed a Telegram-based scraping system from architecture to server deployment.

👜 Experience

Data Science & Machine Learning Practical Projects, School 21 2025 – Present | Samarkand

- Completed 32 Data Science and Machine Learning projects applying regression, classification, and clustering with Python and scikit-learn
- Strengthened ML/DS fundamentals through continuous, project-based coursework over 1+ year

Freelance Developer, Telegram Scraping System 2026

- Designed and built a Telegram scraping system from scratch using Python and TypeScript
- Deployed the system using Docker and server-side infrastructure tools

🎓 Education

Data Science — Machine Learning Track, School 21 [🔗](#) 2025 – 2026 | Samarkand

🧠 Technical Skills

Programming

Python

Machine Learning

PyTorch, scikit-learn

Deployment

Docker, Nginx, Oracle Cloud

Other

VS Code, Git, GitHub

🌐 Languages

Uzbek

Native

English

Basic (reading/listening)

Russian

Basic (reading/listening)

📁 Projects

Revolutionary Layers Method [🔗](#), Personal startup strategy framework 07/2026

- Created and documented a method for analyzing startup ideas and business problems; published in Uzbek, English, and Russian. [GitHub]

Personal AI Agent [🔗](#), jaloliddin-xalimov.uz 03/2026

- Designed a production AI agent that answers visitor questions and self-diagnoses backend issues via log/code analysis; on approval via Telegram, it applies fixes and triggers a rebuild/redeploy
